ULTIMATE OFFICE COMPOST PROGRAM

Offices don't have access to a formal composting program, meaning all organic waste is put into the garbage and sent to the landfill. Our Ultimate Office Composting Program helps local businesses take control of their food waste to create a cleaner office and a greener world.

HOW IT WORKS?

GET YOUR GREEN BIN

Sign up and choose the right number of bins for your office, considering the number of eating areas and washrooms in your office space.

START COMPOSTING

Your employees are encouraged to compost all food scraps, small amounts of liquids and some paper products.

WE DO THE WORK

Our team will pick-up and replace your bin on a weekly or twice weekly basis, meaning no smell and no hassle for your team.

TRACK YOUR IMPACT

Your organic waste enters the compost stream in one of three ways and you'll receive a regular update about your office's impact.
